

ANCHIT SANGHOI

+91 9940214904 || New Delhi, India || anchit.sanghoi@gmail.com || <https://www.linkedin.com/in/anchit-sanghoi/>

Professional Summary

Data & AI Engineering Lead with 8.5+ years of experience architecting and scaling high-volume enterprise data systems in the BFSI sector. A proven "player-coach" specializing in Google Cloud Platform (BigQuery, Dataproc, Airflow), legacy Big Data ecosystems (Spark, Hadoop), and modern GenAI integrations (AIGF certified). Recognized for driving complex technical deliveries, rescuing critical production pipelines, and leading cross-functional teams to translate ambiguous business requirements into scalable, reliable data products.

TECH SKILLS

- **Cloud & Architecture:** GCP (Google Cloud Platform), BigQuery, Cloud Dataproc, GKE, Cloud Storage, Cloud SQL
- **AI & Generative AI:** RAG Architectures, LLM Integration, AIGF Framework
- **Big Data & Processing:** Hadoop, Apache Hive, Spark, Scala, Kafka, MapReduce, Oozie, CDC Streaming
- **Pipelines & Orchestration:** DBT, Cloud Composer (Airflow), CDAP (Cask Data Application Platform)
- **DevOps & CI/CD:** Spinnaker, Harness, Jenkins, GitHub Actions, SonarQube, Nexus, Docker
- **Methodologies:** Agile, Scrum, BDD, TDD, CI/CD Frameworks

PROFESSIONAL EXPERIENCE

Data & AI Engineering Lead (Official: Senior Associate Data Engineer) 11/2024 - Present

Publicis Sapient New Delhi, India

Client - Leading UK Financial Institution

- **Delivery Leadership:** Directed the engineering strategy and delivery for Transactions Team, transitioning from an individual contributor to leading the end-to-end execution of critical data products under tight, ambiguous deadlines.
- **AI & GenAI Integration:** Pioneered the integration of GenAI capabilities alongside traditional workflows, leveraging an intensive 6-month AIGF certification to design scalable, LLM-powered data architectures.
- **Platform-Wide Migrations:** Orchestrated the cross-team CI/CD migration from Spinnaker to Harness, identifying and securing 15+ complex delivery pipelines to ensure zero-downtime production validations.
- **Incident Management & Resilience:** Led the critical recovery of production data loss incidents; engineered the rapid recreation of datasets and pipelines across BLD to PROD environments, restoring full business capability within SLA.
- **Cross-Functional Enablement:** Architected scalable consumer onboarding processes utilizing DBT, Big Query, Cloud Composer, and TWS, successfully unblocking 10+ consumer teams and earning direct stakeholder recognition.
- **Engineering Culture:** Founded and scaled multiple weekly "Engineering Connect" sessions and reusable onboarding frameworks, bridging technical knowledge gaps and significantly reducing ramp-up time for new NGI group engineers.

IT Analyst (Lead Software Engineer) 01/2022 – 10/2024

Tata Consultancy Services Bristol, UK

Client - Leading UK Financial Institution

- **Enterprise Big Data Frameworks:** Engineered and maintained fully managed batch and streaming ETL frameworks on Hadoop, ensuring robust and scalable data processing for critical banking operations.
- **High-Volume Ingestion Architecture:** Architected reusable data ingestion patterns featuring automated validations and reconciliations, handling 300+ daily feeds via CI/CD pipelines as a standardized solution across multiple banking franchises.

- **GCP Cloud Modernization:** Spearheaded the transition to Google Cloud Platform by developing a capability framework for ETL processing using ephemeral Dataproc clusters and Cloud Composer to generate highly reliable Origin Data Products (ODP).
- **Cross-Team Cloud Alignment:** Established reusable architectural patterns for inbound agile teams, ensuring strict alignment with strategic GCP solutions to deliver scalable Foundation and Consumption Data Products.
- **Strategic Data Modelling:** Initiated and delivered a successful Proof of Concept utilizing Data Build Tool (DBT) and GKEStartPod operators in Airflow DAGs to orchestrate complex data transformations.

System Engineer

02/2017 to 12/2021

Tata Consultancy Services

New Delhi, India

Client - Leading UK Financial Institution

- **DevOps & CI/CD Automation:** Championed DevOps best practices at the project level, driving the onboarding of inbound teams to modern technologies including BDD, containerization, and automated CI/CD integrations (GitHub, Jenkins, Nexus, SonarQube, Urban Code).
- **Data Lake Delivery:** Developed and executed key stakeholder requirements for massive data transfers into enterprise data lakes for advanced post-processing within an Agile Scrum methodology.
- **Team Mentorship & Technical Standards:** Led engineering guilds for verifying RTL processes and live scheduling requirements, while actively mentoring junior resources to elevate project-level technical standards.
- **Project Leadership:** Assigned critical roles by management for project stability, including delivering technical demonstrations and representing the engineering team at virtual events and seminars.

ACHIEVEMENTS, AWARDS & CERTIFICATION

Certifications & AI Upskilling

- AI Generalist Fellowship (AIGF) | *Outskill (Completed 06/2025)*: Completed a dynamic 6-month intensive program mastering real-world AI applications, including RAGs, Voice Agents, Prompt Engineering, Automations, AI Agents, and No-Code Product Development.
- Technical Certifications: GCP (LinkedIn Learning), Big Data Developer (Internal Curriculum).

Leadership & Client Recognitions (2024 – Present)

- Exceptional Leadership & Client Impact: Officially commended by the Director of Technology for exceptional client management, building trust at lightning speed, and setting a high benchmark for excellence while leading NGI Transaction Team 2.
- Cross-Team Enablement Praise: Specially recognized by the Finance Data Lab and downstream product owners for providing critical SME input, engineering support, and environment access that successfully unblocked downstream teams during the highly complex PB Loans delivery.
- Core Value Awards: Earned multiple awards including "Partnering for Client Impact" and "Thriving Team" for leading the development and single-handedly managing the production deployment of the System of Insight (SOI) on GCP.

Innovation & Legacy Deliveries (Pre-2022)

- GCP Cloud Migration (GCP Ninja): Designed and developed a GCP-based issue tracker and ticketing system utilizing MongoDB and Python as a foundational Proof of Concept for broader cloud adoption.
- Big Data Transformation: Modernized system auditing by introducing the ELK stack and Kafka to seamlessly transfer Hive operation logs to end-user Kibana dashboards.
- Delivery Excellence: Recipient of 10x "On The Spot" Awards, 5x Team Awards, and the Star of the Quarter/Month awards for sustained technical excellence and platform sustenance.

EDUCATION

BTech, Mechanical Engineering, SRM University, Chennai, India

Graduated June 2016
